

<b>L</b>	<b>101 Lab Safety</b>	<b>Rating</b>
	Name: _____ Class: _____	

**Aim:** How can we practice being safe in the chemistry laboratory?

### 1. Safe Lab Practices

Identify all the unsafe laboratory practices in the three lab scenarios below.

### 2. Laboratory Safety Equipment

Sketch a diagram of your chemistry lab and identify the location of all the safety equipment which may include: Chemical Safety Shower (CSS), Eye Wash Station (EWS), Fire Extinguisher (FE), and Fire Blanket (FB).

### 3. Chemical Labels

Identify each of the chemical symbol shown below

---

### 4. Dressing for the Lab

Describe how you should dress for the lab.

---

---

---

---

---

---

### 5. Hazardous Scenarios

a. Describe how you would respond if you spilled a few drops of acid on your arm.

---

---

---

---

b. Describe how you would respond if the sleeve of a member of your lab group caught on fire.

---

---

---

---

### 6. Waste Disposal

Describe how you would dispose of waste in the laboratory.

---

---
